

**N. Ireland Cancer Trials Centre/
N. Ireland Cancer Trials Network
Trials Open to Recruitment – January 2012**

Bowel Cancer

NSCCG National Study Of Colorectal Cancer Genetics (*also available in Altnagelvin, Antrim, Craigavon and Ulster Hospital*)

SCOT Short Course Oncology Therapy (*also available in Altnagelvin and Craigavon Hospitals*)

CREST The role of endoluminal stenting in the acute management of obstructing colorectal cancer (*Available in Ulster Hospital only*)

E-Scout A Phase II Study Evaluating The Use Of Concurrent Cetuximab, Irinotecan, Oxaliplatin And UFT In The First Line Treatment Of Patients With Metastatic Colorectal Cancer

NEW!

Low Rectal Low Rectal Cancer Study (*Available in Ulster Hospital only*)

Brain Tumours

NBT National brain tumour study

Breast Cancer

IBIS II DCIS An international multi-centre study of tamoxifen vs anastrozole in postmenopausal women with ductal carcinoma in situ (DCIS)

IBIS II Prevention – An international multi-centre study of anastrozole vs placebo in postmenopausal women at increased risk of breast cancer

Supremo A Phase III Randomised Trial to Assess the role of adjuvant chest wall irradiation in intermediate risk breast cancer after

mastectomy (*information also available in the Ulster Hospital and Craigavon Hospital*)

TNT A randomised phase III comparative trial of carboplatin versus docetaxel for patients with ER- PR- HER2- advanced breast cancer (*also available in Altnagelvin*)

POETIC Trial of Perioperative Endocrine Therapy - Individualising Care (*also available in Craigavon and Ulster Hospital*)

FH02 Mammographic surveillance in women aged 35-39 at enhanced familial risk of breast cancer (*available in Craigavon Hospital only*)

STaBRaD Semi-permanent Tattoos in Breast Radiotherapy (STaBRad) Study: A randomised study to evaluate the 'Precision Plus Micro-pigmentation System' in making semi-permanent tattoos' in radical breast radiotherapy patients

NEW!

QUEST A A multi-centre randomised trial to assess the impact of the type of breast reconstruction on quality of life following mastectomy

NEW!

QUEST B A multi-centre randomised trial to assess the impact of the timing of breast reconstruction on quality of life following mastectomy

Children's Cancer Clinical Trials (see list below)

Gynaecological Cancers

MORPHOTEK A Randomised, Double-Blind, Placebo-Controlled, Phase III Study to Assess the Efficacy and Safety of Weekly Farletumab (MORAb-003) in Combination with Carboplatin and Taxane in Subjects with Platinum-Sensitive Ovarian Cancer in First Relapse

Haematological Clinical Trials (see list below)

Head and Neck Cancer

PET NECK A multi-centre randomized phase III trial comparing PET-CT guided watch and wait policy versus planned neck dissection for the management of locally advanced (N2/N3) nodal metastases in patients with head and neck squamous cancer

Lung Cancer

MAGRIT A double blind, randomised, placebo-controlled Phase III Study to assess the efficacy of RecMAGE-A3 plus ASIS Antigen Specific Cancer Immunotherapeutic as adjuvant therapy in patients with respectable MAGE-A3-positive non-small cell lung cancer

CONVERT Concurrent Once-Daily Versus Twice-Daily Radiotherapy: A 2-arm randomized, Controlled Trial of Concurrent Chemo-radiotherapy Comparing Twice-daily and Once-daily Radiotherapy Schedules in Patients with Limited Stage Small Cell Lung Cancer (SCLC) and Good Performance Status (*information also available at Craigavon Hospital*)

QUARTZ A Phase III Multi-Centre Randomised Controlled Trial To Assess Whether Optimal Supportive Care Alone (including Dexamethasone) Is As Effective As Optimal Supportive Care (including Dexamethasone) Plus Whole Brain Radiotherapy In The Treatment Of Patients With Inoperable Brain Metastases From Non-Small Cell Lung Cancer (*information also available at Craigavon Hospital*)

FRAGMATIC A randomised phase III clinical trial investigating the effect of FRAGMin Added to standard Therapy In patients with lung Cancer (*also available in Altnagelvin and Craigavon Hospitals*)

TRANSCRIPT A study to assess the incidence of mutations in the tyrosine kinase domain of the epidermal growth factor receptor in UK patients with newly diagnosed locally advanced or metastatic non-small cell lung cancer and to investigate the quality of life of these patients undergoing first-line monotherapy with erlotinib (Tarceva) (*available at Altnagelvin and Craigavon Hospital*)

Pancreatic Cancer

GAMMA A Phase III, Multicentre, Randomised, Double-Blind, Placebo-Controlled, Trial of AMG 479 or Placebo In Combination With Gemcitabine As First-Line Therapy For Metastatic Adenocarcinoma Of The Pancreas

Prostate Cancer

Stampede Systemic Therapy in Advancing or Metastatic Prostate cancer - Evaluation of Drug Efficacy

UKGPC UK Genetics Prostate Cancer Study (*also available in Altnagelvin, Craigavon and Ulster Hospital*)

Dex-IL8 A Study Examining The Association Of Serum Interleukin-8 (IL-8) With Response To Dexamethasone In Metastatic Hormone-Refractory Prostate Cancer (HRPC)

Radicals Radiotherapy and Androgen Deprivation in Combination after Local Surgery. A Randomised Controlled Trial in Prostate Cancer

Rapper Radiogenomics: Assessment of Polymorphisms for Predicting the Effects of Radiotherapy (only available for patients who have participated in CHHIP study) (*also available in Altnagelvin*)

Tripocare LT A prospective observational study cohort to assess the rate of castration resistance, disease progression and overall survival over a 3-year period post-androgen deprivation therapy induction in patients with advanced prostate cancer who have previously participated in the tripocare study (only available in the Ulster Hospital)

Millennium C21004 A Phase III, Randomised, Double-Blind, Multicentre Trial Comparing Orteronel (TAK-700) Plus Prednisone with Placebo plus Prednisone in patients with Chemotherapy Naïve Metastatic Castration Resistant Prostate Cancer

Millennium C21005 A Phase III, Randomised, Double-Blind, Multicentre Trial Comparing Orteronel (TAK-700) Plus Prednisone with Placebo plus Prednisone in patients with Chemotherapy Naïve Metastatic Castration Resistant Prostate Cancer that has progressed during or following Docetaxel based Therapy

DNA Biomarker Study A study examining the change in serum biomarkers of DNA damage and tissue damage in patients undergoing radical radiotherapy for prostate cancer

NEW!

PROCTIS Living with and beyond Prostate cancer - A study of the impact on men of increased and variable investigation and treatment of prostate cancer in the Island of Ireland

Renal Cancer

SORCE A Phase III Randomised, Double-Blind Study Comparing Sorafenib with Placebo in Patients with Resected Primary Renal Cell Carcinoma at High or Intermediate Risk of Relapse

Stomach Cancer

STO3 A Randomised Phase II/III Trial of Peri-Operative Chemotherapy with or without Bevacizumab in Operable Adenocarcinoma of the Stomach and Gastro- oesophageal Junction

Testicular Cancer

UK TGCT Genetics Study Identification of testicular germ cell tumour susceptibility genes – the UK genetics of testicular cancer study

Studies not specific to a particular type of cancer

Early Phase Trial

A4991014 A Parallel Arms Phase 1 Safety, Pharmacokinetic And Pharmacodynamic Study Of The Intravenous Poly(ADP-RIBOSE) Polymerase (PARP) Inhibitor PF-01367338 (AG-014699) In Combination with Several Chemotherapeutic Regimens In Adult Patients With Advanced Solid Tumours

Translational Study

HER Shedding A pilot study investigating the predictive role of chemotherapy-induced changes in serum Human Epidermal Receptor (HER) ligand levels in patients with solid tumours

Haematological Clinical Trials

Leukaemia

AML 16 A Programme of Treatment Development for Older Patients with AML or High Risk MDS (*also available in Altnagelvin*)

SPIRIT 2 ST1571 Prospective International Randomised Trial 2 - A Phase III, Prospective Randomised Comparison Of Imatinib (ST1571, Glivec/Gleevec) 400mg daily versus Dasatinib (Sprycel) 100mg daily In Patients With Newly-Diagnosed Chronic Phase Chronic Myeloid Leukaemia (*also available in Altnagelvin & Ulster Hospital*)

AML 17 A programme of development for the treatment of younger patients with acute myeloid leukaemia and high risk myelodysplastic syndrome

Lymphoma

PACIFICO Purine-Alkylator Combination In Follicular lymphoma Immuno-Chemotherapy for Older patients: a phase III comparison of first-line R-CVP versus R-FC (*also available in Altnagelvin*)

Multiple Myeloma

Myeloma X A phase III study to determine the role of a second autologous stem cell transplant as consolidation therapy in patients with relapsed multiple myeloma following prior high-dose chemotherapy and autologous stem cell rescue

IMPACT An Observational Study of Neutropenia in Subjects being treated for Relapsed or Relapsed/Refractory Multiple Myeloma

ASPIRE A Randomized, Multicenter, Phase 3 Study Comparing Carfilzomib, Lenalidomide, and Dexamethasone (CRd) vs Lenalidomide and Dexamethasone (Rd) in Subjects with Relapsed Multiple Myeloma

Other Haematological

PT1 An MRC Randomised Trial To Compare Aspirin versus Hydroxyurea / Aspirin in 'Intermediate Risk' Primary Thrombocythaemia and Hydroxyurea / Aspirin versus Anagrelide / Aspirin in 'High Risk' Primary Thrombocythaemia (*also available in Altnagelvin, Antrim, Craigavon and Ulster Hospital*)

Expanded PNH Registry Paroxysmal Nocturnal Haemoglobinuria (PNH) Registry

Resume A Phase III, Multicentre, Randomised, Double-Blind, Placebo-Controlled, Parallel-Group Study To Compare Efficacy And Safety Of Pomalidomide In Subjects With Myeloproliferative Neoplasm-Associated Myelofibrosis And Red Blood Cell-Transfusion-Dependence

TELESTO Multi-Centre, Randomised, Double-Blind, Placebo-Controlled Clinical Trial of Deferazirox In Patients With Myelodysplastic Syndromes (Low/Int - 1 Risk) and Transfusional Iron Overload

Early Phase Trial

INCA 2201 A Phase Ib, Open-Label, Dose-Finding Study Of The JAK-Inhibitor INC424 Tablets Administered Orally To Patients With Primary Myelofibrosis (PMF), Post-Polycythaemia Vera-Myelofibrosis (PPV-MF) Or Post-Essential Thrombocythemia-Myelofibrosis (PET-MF) And Baseline Platelet Counts $\geq 50 \times 10^9/L$ And $< 100 \times 10^9/L$

NEW!

Clonal Blood Cell Disorder The causes of clonal blood disorders

Children's Cancers

(Royal Belfast Hospital for Sick Children)

EURO EWING 99 (ET 2000 03) European Ewing Tumour Working Initiatives of National Groups: Ewing Tumours Studies 1999

Low Grade Glioma 2004 (LGG2/CNS 2004 03) Cooperative Multicentre Study for Children and Adolescents with Low Grade Glioma

High Risk Neuroblastoma (NB 2002 06) High Risk Neuroblastoma

Non Metastatic Rhabdomyosarcoma (RMS 2005/STS 2006 04)
Non metastatic Rhabdomyosarcoma

SIOP Wilms (WT 2002 01) SIOP Nephroblastoma Clinical Trial

NAFSIE Neuropsychological academic and functional outcomes in survivors of infant ependymoma

Relapsed ALL (ALLR3) Relapsed ALL
